SQL Monitoring survey

Hi,

As part of our continuous efforts to expand and improve the InterSystems IRIS Data Platform, we've set up a brief survey around SQL monitoring. Your feedback will help us in designing and developing the right tools for the job and improve the platform's overall ease-of-use. Please use the link below to access the survey, which should only take around 5 minutes to complete.

https://www.research.net/r/WGX26TS

As always, please don't hesitate to leverage the Developer Community or the WRC if you have any questions or feedback on our products.

Thanks in advance!
benjamin
