Programs and function cache

Hi,

Do you know if cache has programs and functions cache

I made a backup of my production base and when I use this function above I receive an error, but if I change any letter of the command the function go ok.

Didn't work

```
SELECT $$JOB1^KMIGxDESIG() FROM DUAL
```

Work

```
sSELECT $$JOB1^KMIGxDESIG() FROM DUAL
```

for this I.m using ODBC 64.

Thanks
