XML Serialization - output ID

I have a class:

```
Class test.Person Extends (%Persistent, %XML.Adaptor)
{
Property Name;
}
```

I want to serialize it into this XML:

```
<Person>
  <Id>1</Id>
  <Name>Ed</Name>
</Person>
```

Is it possible?

It's for the Visual Trace so I can't use %XML.Writer.
