How to Restart SMP server

Caused by a conflict in the port assignment I get this entry in messages.log and SMP doesn't respond:
08/30/20-12:56:40:714 (15232) 1 [Utility.Event] Private webserver may not start on port 52773, may be in use by another instance

08/30/20-12:56:40:737 (15232) 0 [Utility.Event] Private webserver started on 52773

The first line is true, the second is just wishful thinking 😞
