## Error Condition CSP application closed the connection before sending a complete response.

Hi Team,

I am getting this error while i entered one field and hit search button. The screen spinning for few minutes and prompt this error. Error Condition CSP application closed the connection before sending a complete response. The job is still running in the backend. Is there anything wrong with this SQLQuery, S Select="SELECT \* FROM Sample.Class"

S:EntryDate'="" Where=Where\_ EntryDate = ""EntryDate\_ AND"

S:Location'="" Where=Where\_ Location = ""Location\_ AND"

S:Brand'="" Where=Where\_ Brand = ""Brand\_ AND"

S:Model'="" Where=Where\_ Model Like ""Model\_%' AND"

S:LineNo'="" Where=Where\_ LineNo Like ""LineNo\_%"

S:SortBy'="" OrderBy=" ORDER BY "SortBy

s:SortBy'="" OrderBy=" ORDER BY EntryTime ASC"

S:\$E(Where,\$L(Where)-3,\$L(Where))=" AND" Where=\$E(Where,1,\$L(Where)-4)

S Qry=Select\$S(\$L(Where):" WHERE""Where,1:")\$S(\$L(OrderBy):OrderBy,1:").

Thanks in Advance.

Thanks,

Mohana Priya V.
