w \$zf(-100,"a= './DC hello'") Fetch return value of method in variable "a" from Python

In below command `a` is storing our return value from Python Script, `hello` is our device, our python script is returning device type against passing a parameter, this parameter is a device :

```
w $zf(-100,"a= './DC hello'")
```

Please help us to fetch return value of method in variable "a" returning from Python in cache.

Thanks in advance, experts
