New Video Develop a Python Flask app with InterSystems IRIS in 10 minutes

Hey Developers,

New demo show by InterSystems Product Manager [@Raj Singh](#) is already on [InterSystems Developers YouTube](#):

[Develop a Python Flask app with InterSystems IRIS in 10 minutes](#)

Use InterSystems IRIS as your back end database platform for a web application built in Python Flask. The short story is it's just as easy as with any other database. Configure an ODBC connection to the database and use SQL inside Python to communicate with it.

[Python Flask middleware app with InterSystems IRIS as the back end database Raw](#)

Enjoy and stay tuned!
