InterSystems Developer Community in Portuguese!

Hey Developers,

We have great news for all Portuguese-speaking users of our community!

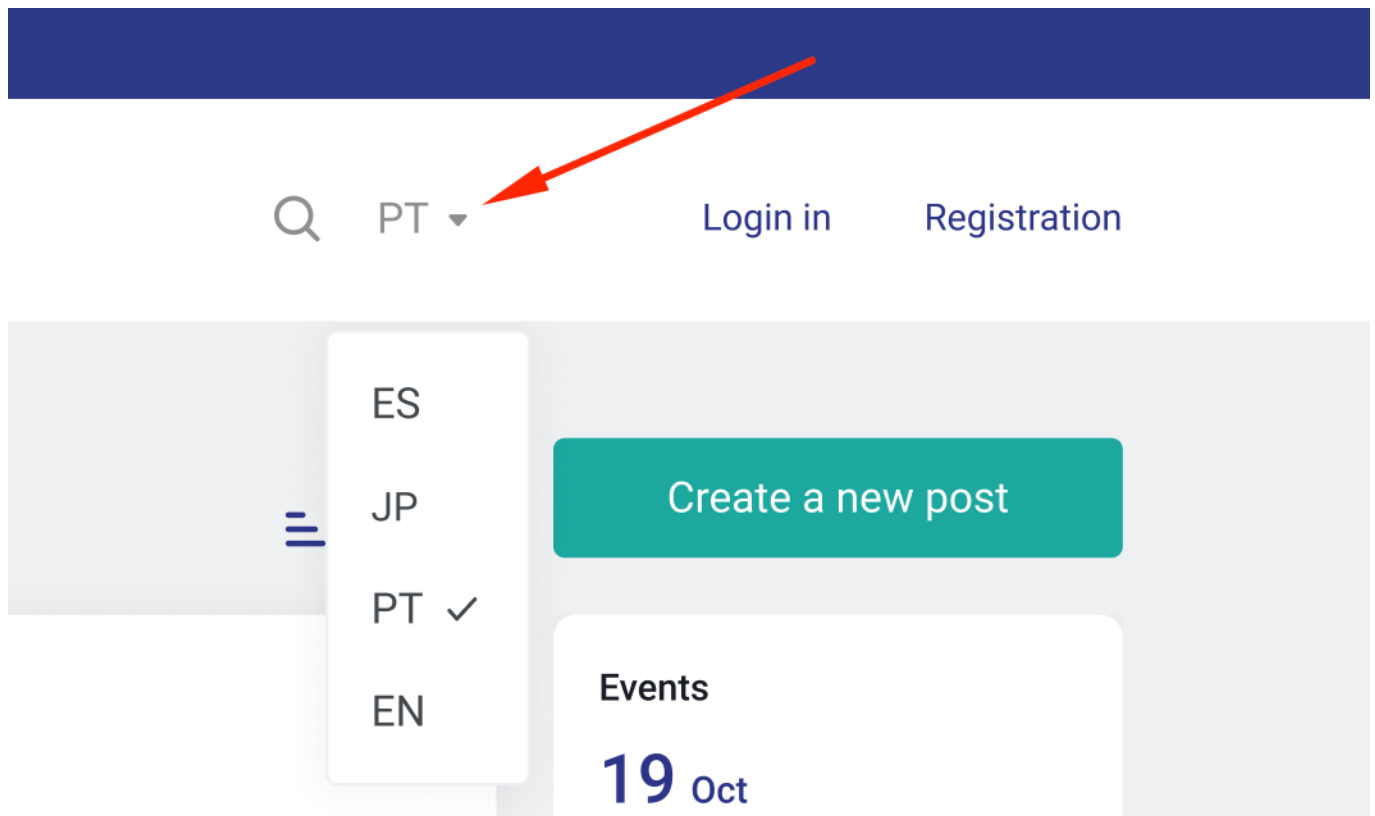

We're pleased to announce the official start of the [InterSystems Developer Community in Portuguese!](#)

And let me introduce to all community [@Rochael Ribeiro](#) and [@Angelo Bruno Braga](#) from [InterSystems Brazil](#) as managers of the InterSystems Developer Community in Portuguese!

Here are the main points you need to know:

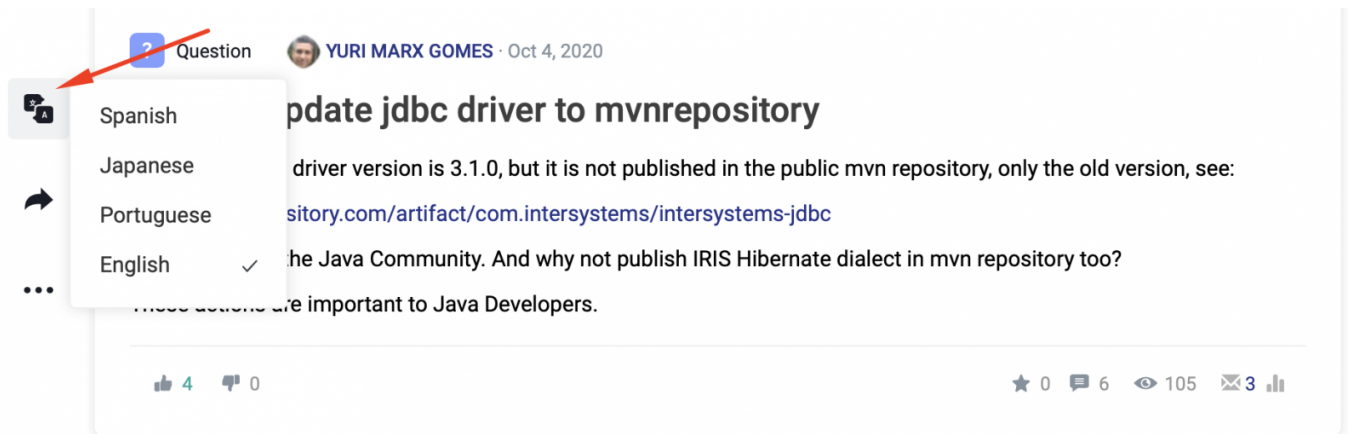

You can switch between sites using language buttons in the top right corner:

If you know Portuguese, it's great that you can contribute articles, make discussions, ask and answer questions about InterSystems Data Platforms now in Portuguese too!

Also!

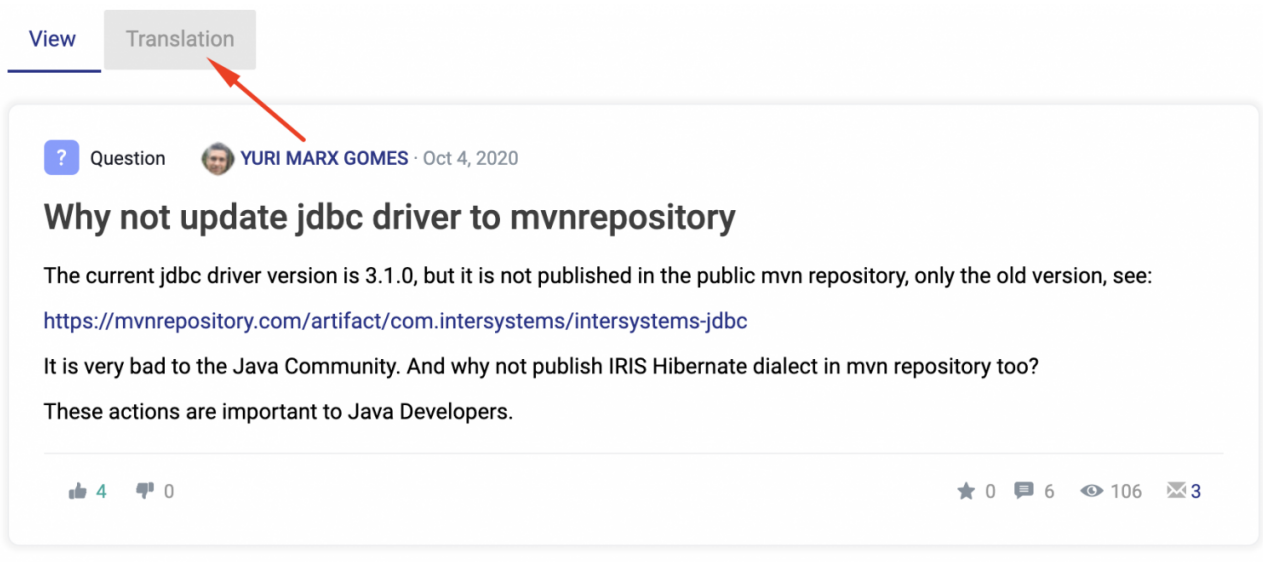

You can use Language Switcher – the option to switch to the Portuguese version of the article.

Also!

If you posted an article in English it could be translated by anyone in Portuguese and will be helpful for even more people!

Everyone is able now to add a translation to an article on the Developer Community. If you want to add a translation, request it on the articles page in a Translation tab or if you already have a translation of the post, just provide the URL there:

The same thing works for the Community site in Portuguese – you can translate the Portuguese article into English. Be sure, you know both languages well!

So!

Don't hesitate to provide your feedback on how to make the InterSystems Community in Portuguese better.

And welcome to the [InterSystems Developer Community in Portuguese!](#)

Stay tuned!
