How to Download and Install InterSystems IRIS

Updated guide

[>> How to get InterSystems IRIS Community Edition](#)

IRIS Community Edition Installation Process.

Hello there developers,

As a new amateur to the Developer Community, I had a few hurdles that I had to cross in order to find a way and install the IRIS for Community Edition.

The Developer Community has been very helpful in guiding me through this process, and which has made me write this post today.

I believe that this will be helpful for any armature on the Developer Community trying to get hands on experience with IRIS.

Steps to be followed.

Step 1

Become a member of the Developer Community.

For this you either need to be invited to the Developer Community by a friend of yours or you need to be referred to it via the Global Masters which also needs to be done by a friend.

OR

You can log on to the following link and become a member of the Developer community.

Step 2

Once you are a registered member of the DC you need to download IRIS of your choice or you could also use IRIS online. The link for both will be given below.

How to Download and Install InterSystems IRIS

Published on InterSystems Developer Community (<https://community.intersystems.com>)

The screenshot displays the InterSystems Developer Community website. The top navigation bar includes links for Learning, Documentation, Community, Open Exchange, Global Masters, and Certification. The main content area features a forum post titled "XML string query" by Virat Sharma, posted 12 hours ago. The post discusses a problem with XML string manipulation and asks for help. Below the post, there are buttons for "Continue Reading" and "Open Exchange App". To the right of the post, there are sections for "News", "App of the week", and "Events". The left sidebar contains "InterSystems Resources" and "All sections".

If you are to download the IRIS then you got to choose from either one of these 2 of your choice.

NOTE: You are eligible to do this only if you are a registered use.

1. InterSystems IRIS for Health Community Edition.
2. InterSystems IRIS Community Edition

There on all you must do is read and provide appropriate details and appropriate storage location for the application to be downloaded and installed.

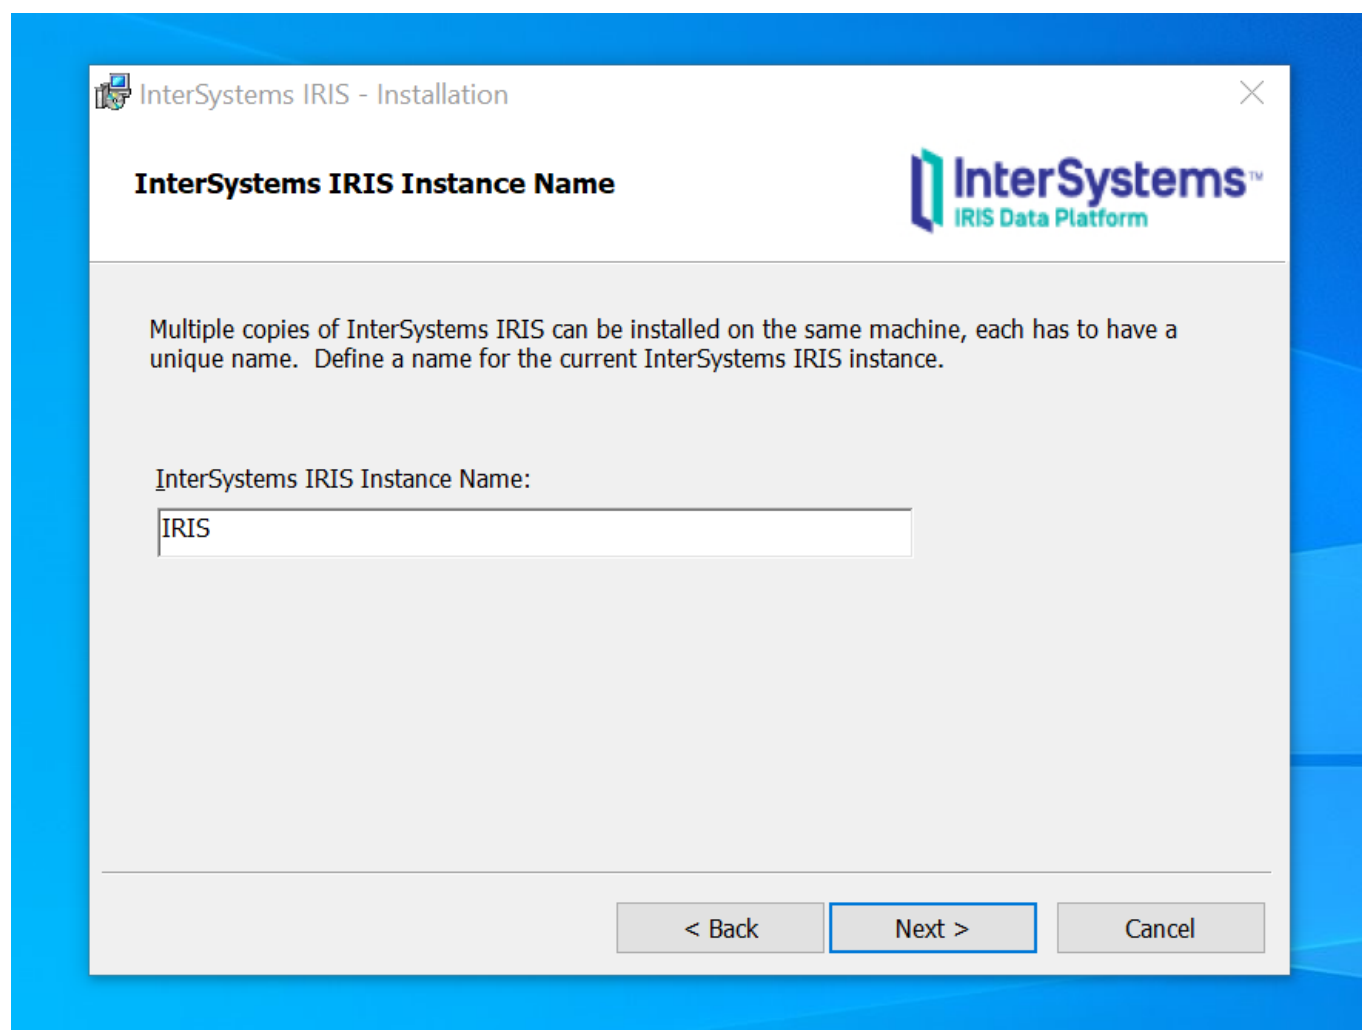

Step 3

User License Agreement Acceptance.

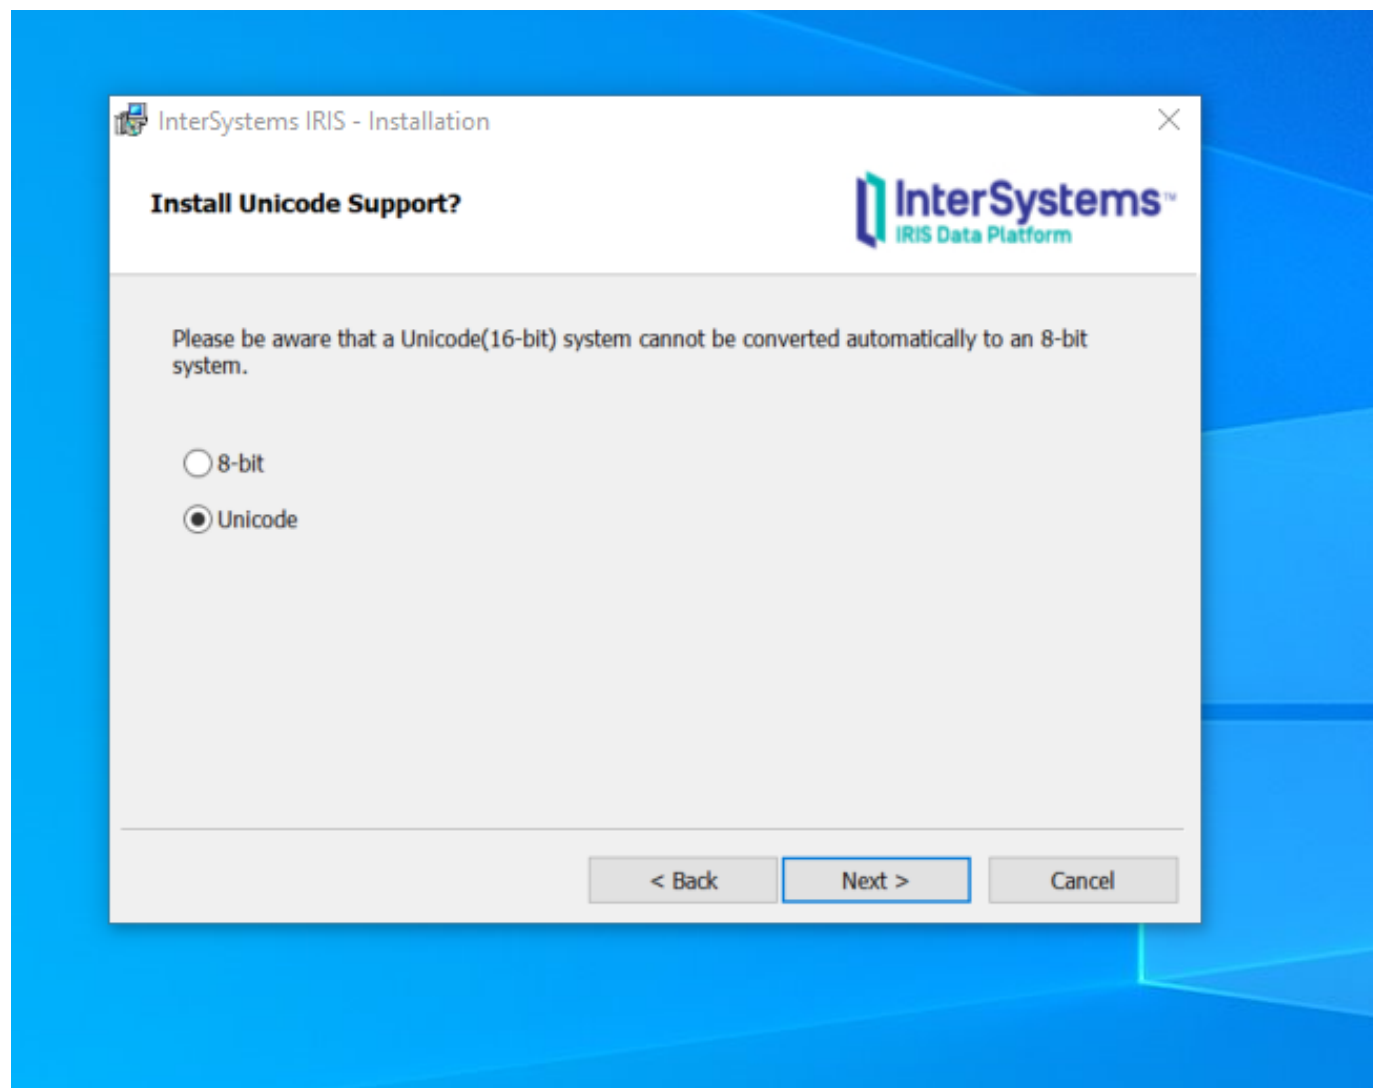

Step 4

Appropriate naming

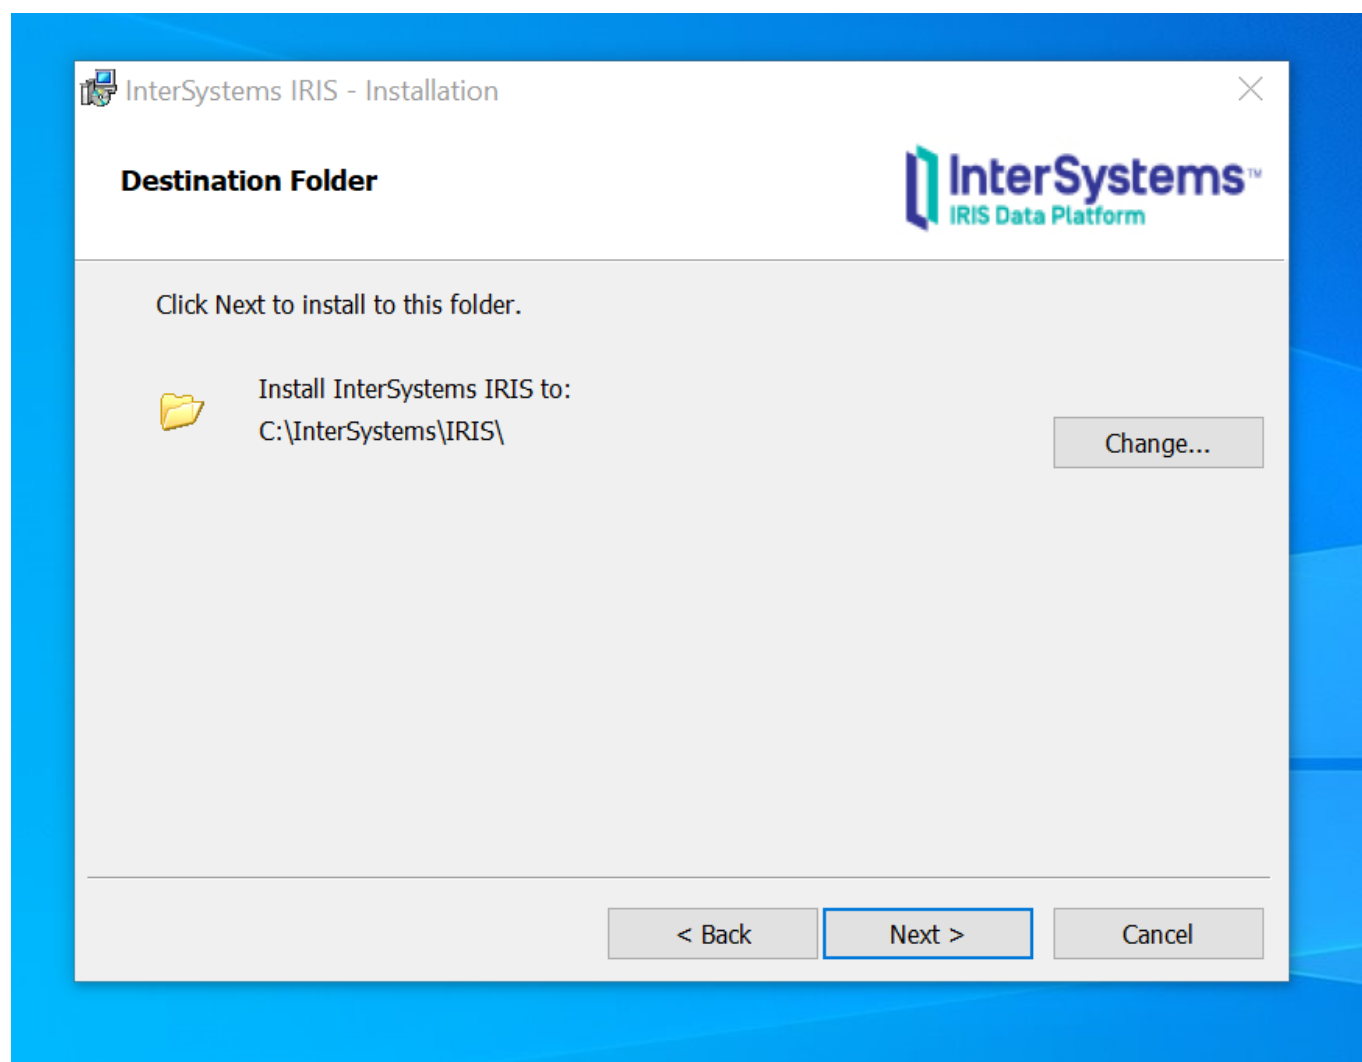

Choosing the appropriate Uni code.

For any new application you'll want to select Unicode. 8-bit would be used for legacy applications that were designed for 8-bit character sets.

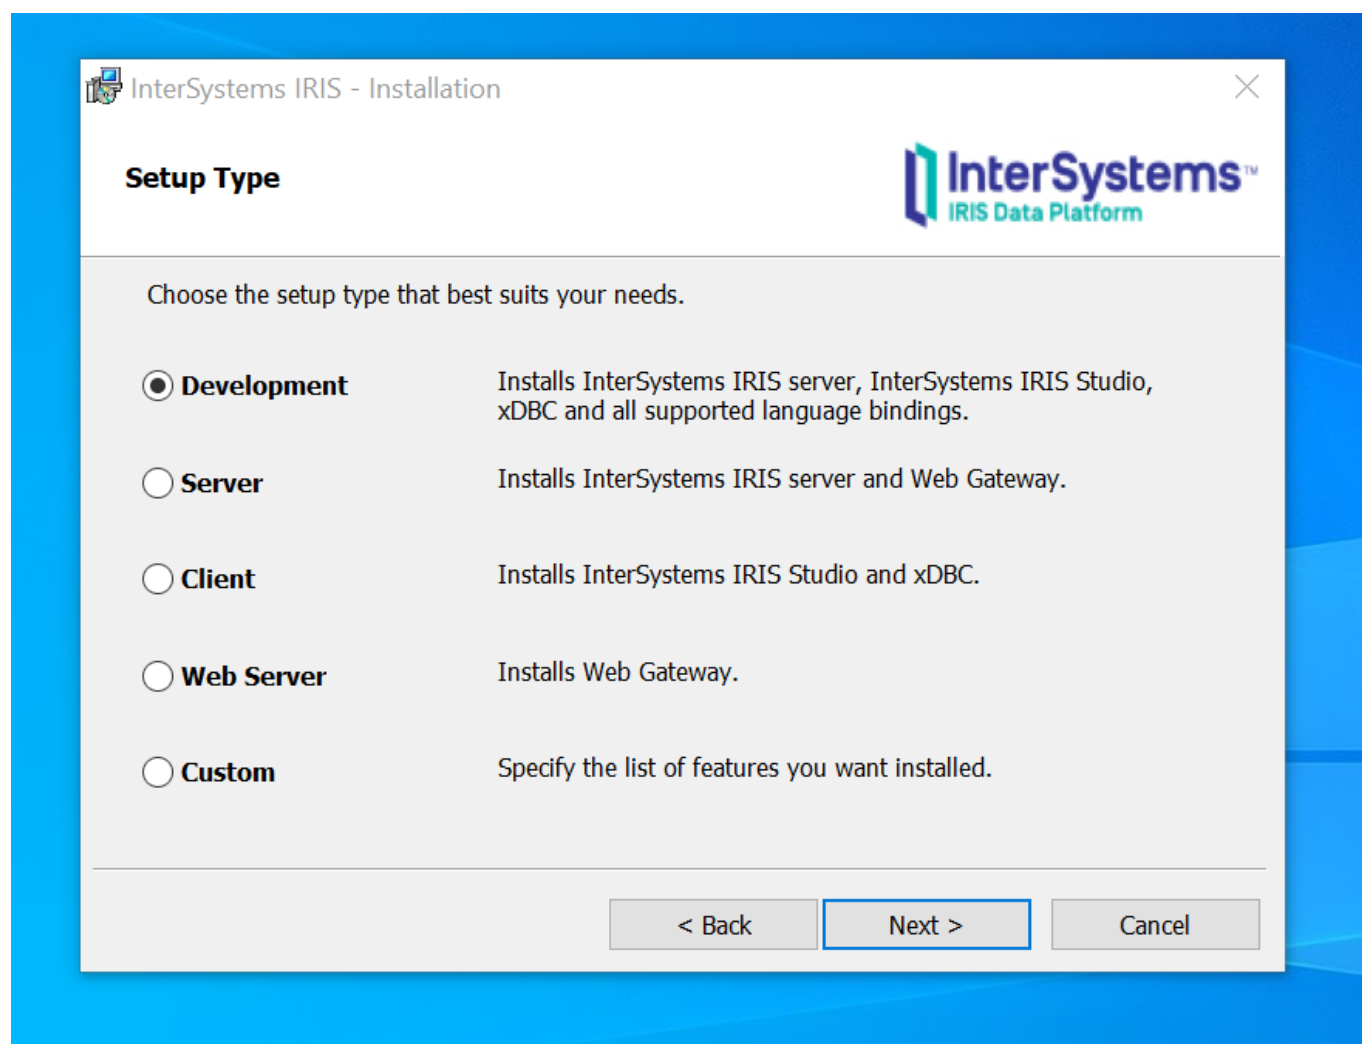

Step 5

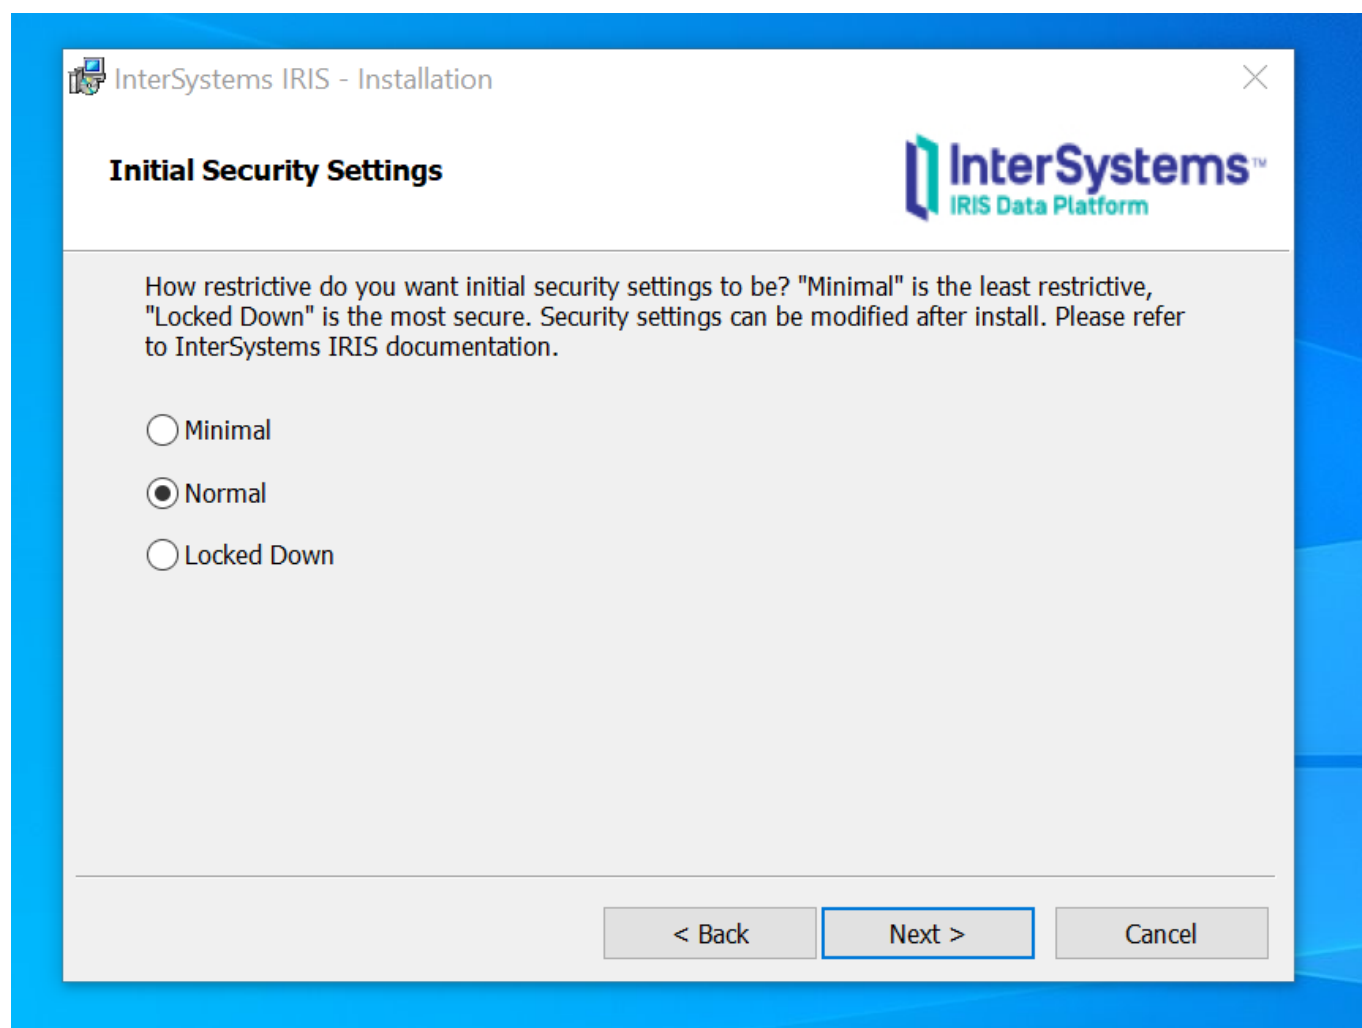

Step 6

By choosing Development you will get the full package installed that is needed for your use.

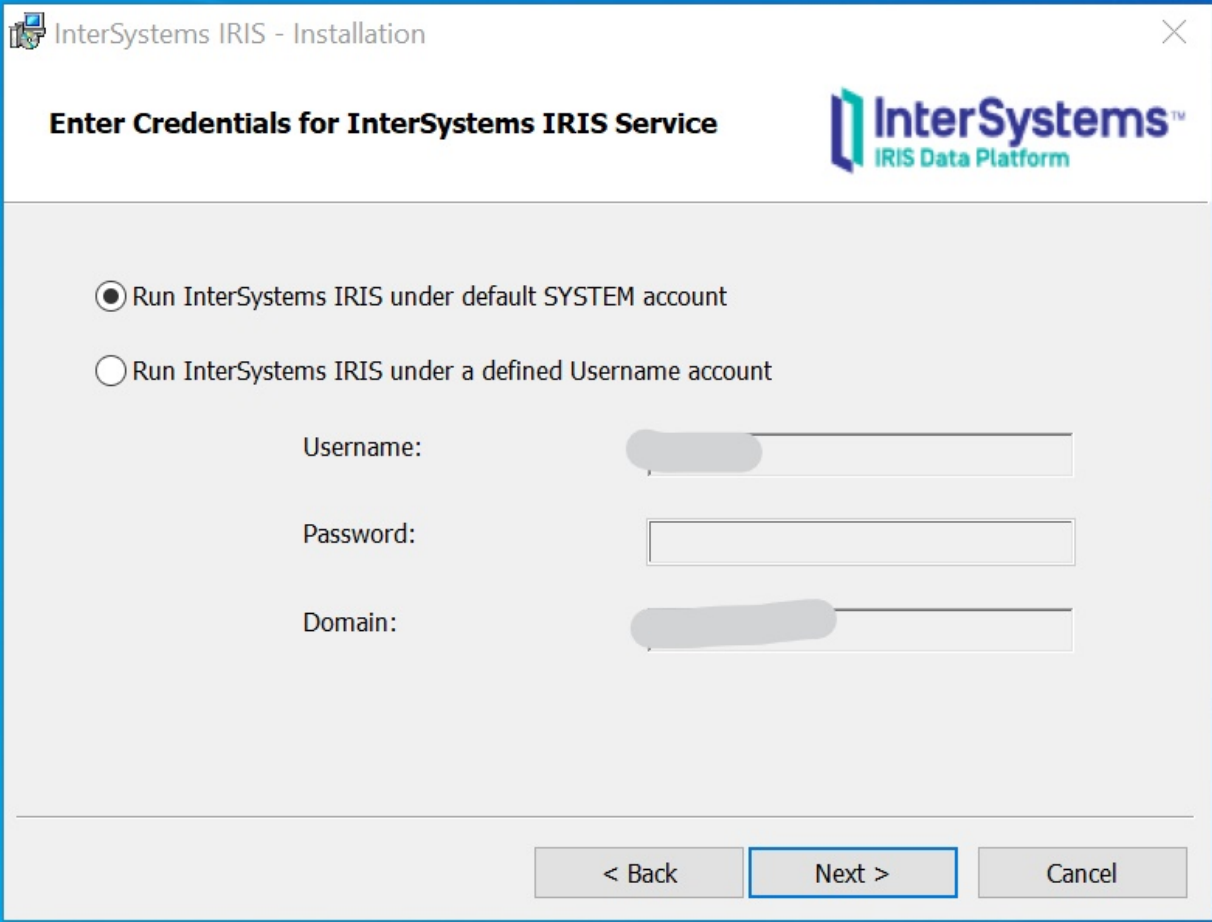

Step 7

Choose appropriate Security Levels depending on the scale of what you are to do.

Step 8

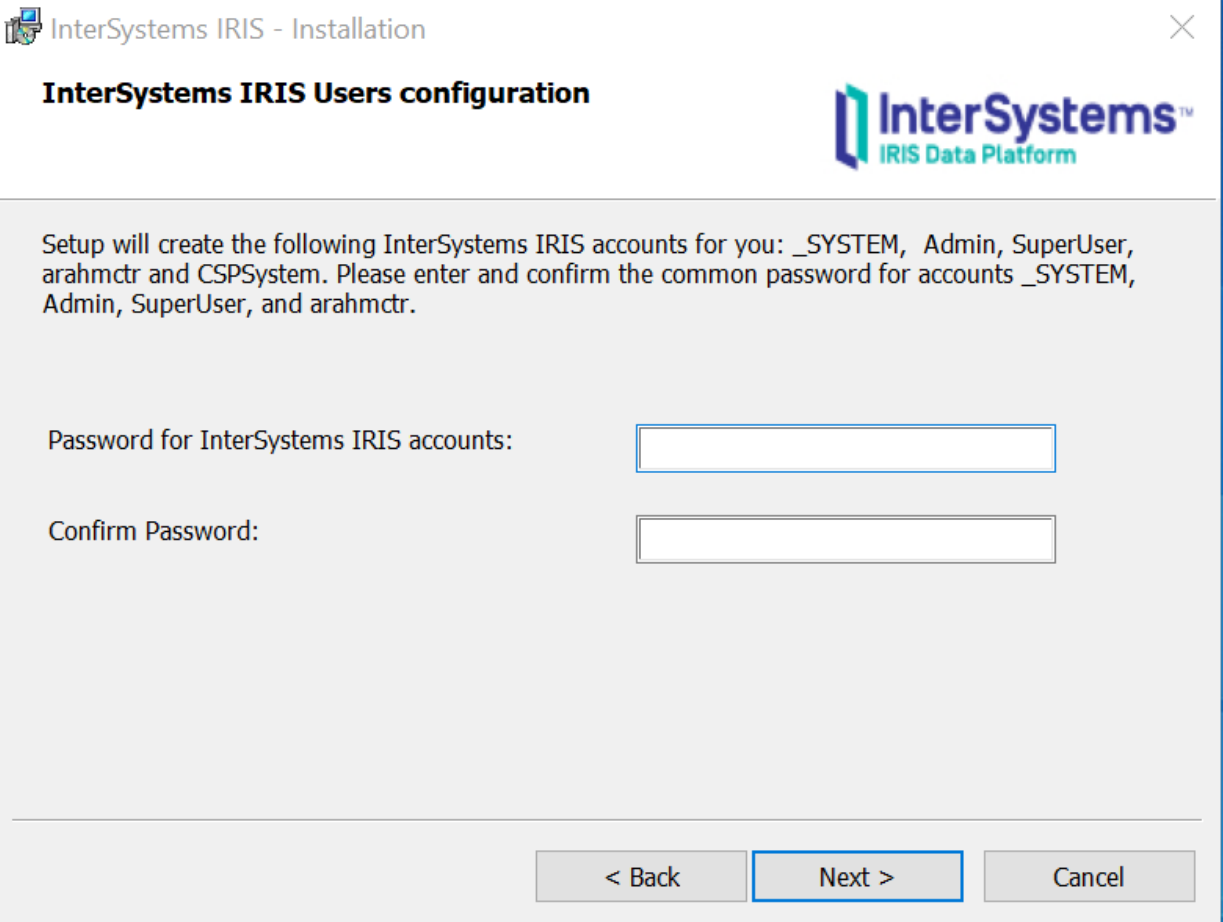

If you are an InterSystems Employee and do not want to get your system clashed better use default System account.

The image shows a Windows-style installation window titled "InterSystems IRIS - Installation". The window has a close button (X) in the top right corner. The main heading is "Enter Credentials for InterSystems IRIS Service", and the InterSystems IRIS Data Platform logo is in the top right. There are two radio button options: "Run InterSystems IRIS under default SYSTEM account" (which is selected) and "Run InterSystems IRIS under a defined Username account". Below these are three input fields: "Username:" (with a greyed-out field), "Password:" (with an empty field), and "Domain:" (with a greyed-out field). At the bottom, there are three buttons: "< Back", "Next >" (which is highlighted with a blue border), and "Cancel".

Step 9

Give it a strong password to secure it.

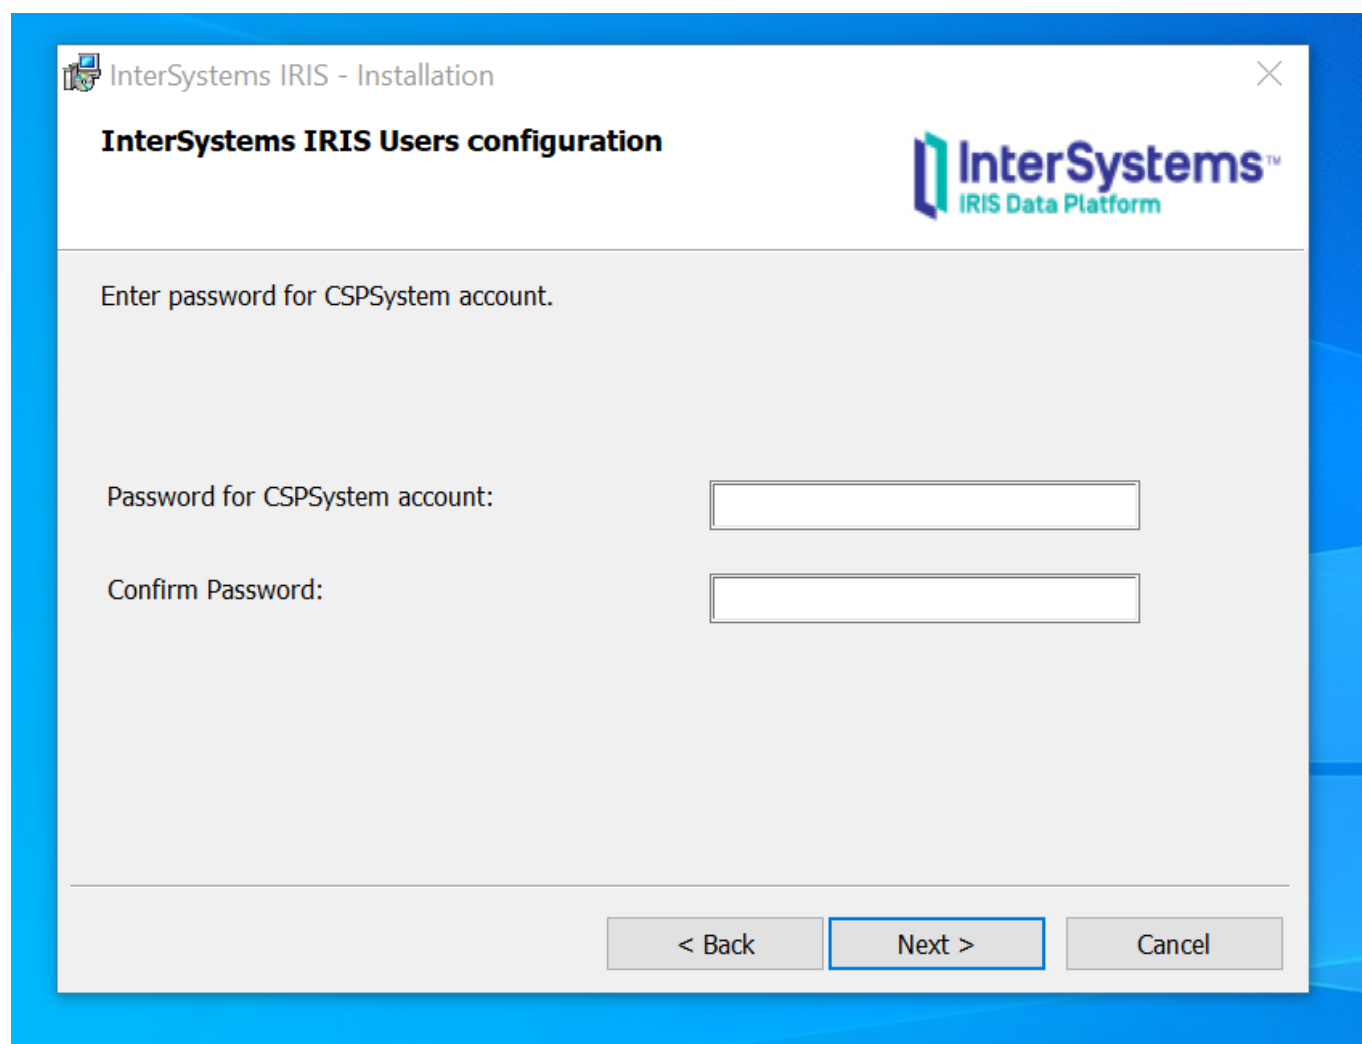

The image shows a screenshot of the 'InterSystems IRIS - Installation' window. The title bar reads 'InterSystems IRIS - Installation'. The main heading is 'InterSystems IRIS Users configuration'. The InterSystems logo and 'IRIS Data Platform' text are in the top right. The text inside the window states: 'Setup will create the following InterSystems IRIS accounts for you: _SYSTEM, Admin, SuperUser, arahmctr and CSPSystem. Please enter and confirm the common password for accounts _SYSTEM, Admin, SuperUser, and arahmctr.' Below this, there are two input fields: 'Password for InterSystems IRIS accounts:' and 'Confirm Password:'. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'.

Step 10

Now you will be required to enter another password for the CSPSystem.

During the installation process a stripped-down version of the apache web server will be installed too (to serve the management portal and for test purposes). This is the CSP-System (CSP means CacheServerPages). Enter a password, you will need it rarely or almost never.

InterSystems IRIS - Installation

InterSystems IRIS Users configuration

InterSystems™
IRIS Data Platform

Enter password for CSPSystem account.

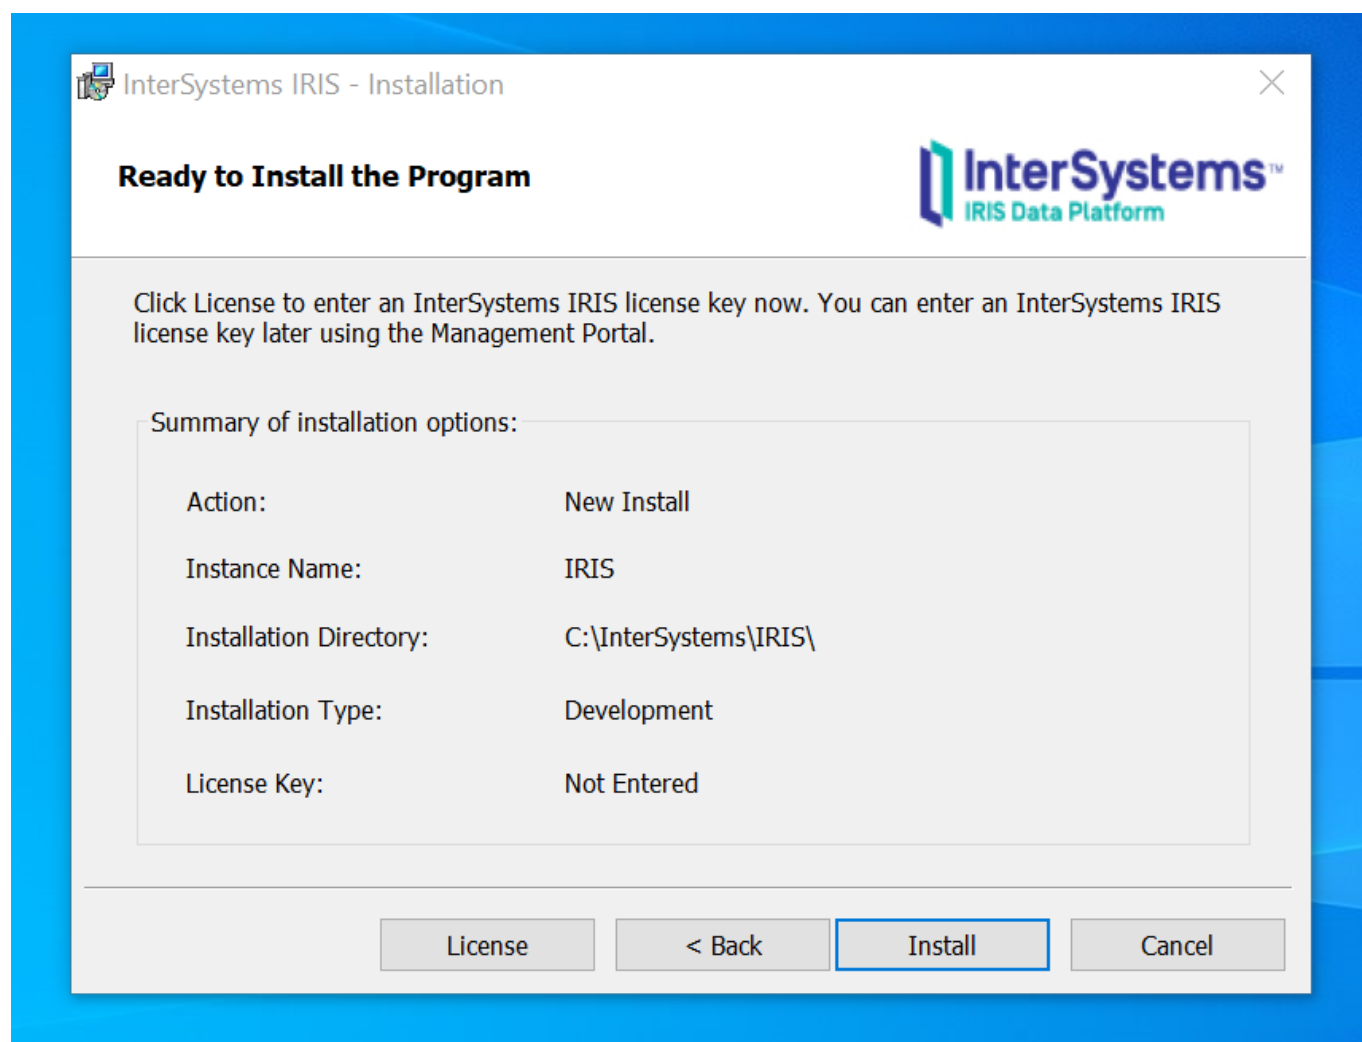

Password for CSPSystem account:

Confirm Password:

< Back Next > Cancel

Step 11

Carry on with the Installation

Step 12

Complete Installation and Enjoy IRIS development
