Hooray!

I'm pleased to announce that [100 ZPM modules](#) are available in the public InterSystems IRIS zpm-repository! Now!

Thank you, developers! This is great that you adopt ZPM Package manager that fast and share your open source add-on libraries for InterSystems IRIS in a form of ZPM packages which means that [each of them](#) could be installed as:

```
USER>zpm "install module-name"
```

Wish to see the next milestone of 1,000 modules soon in 2021!

Thank you!
