Analyze your spent time programming

Hi Community,

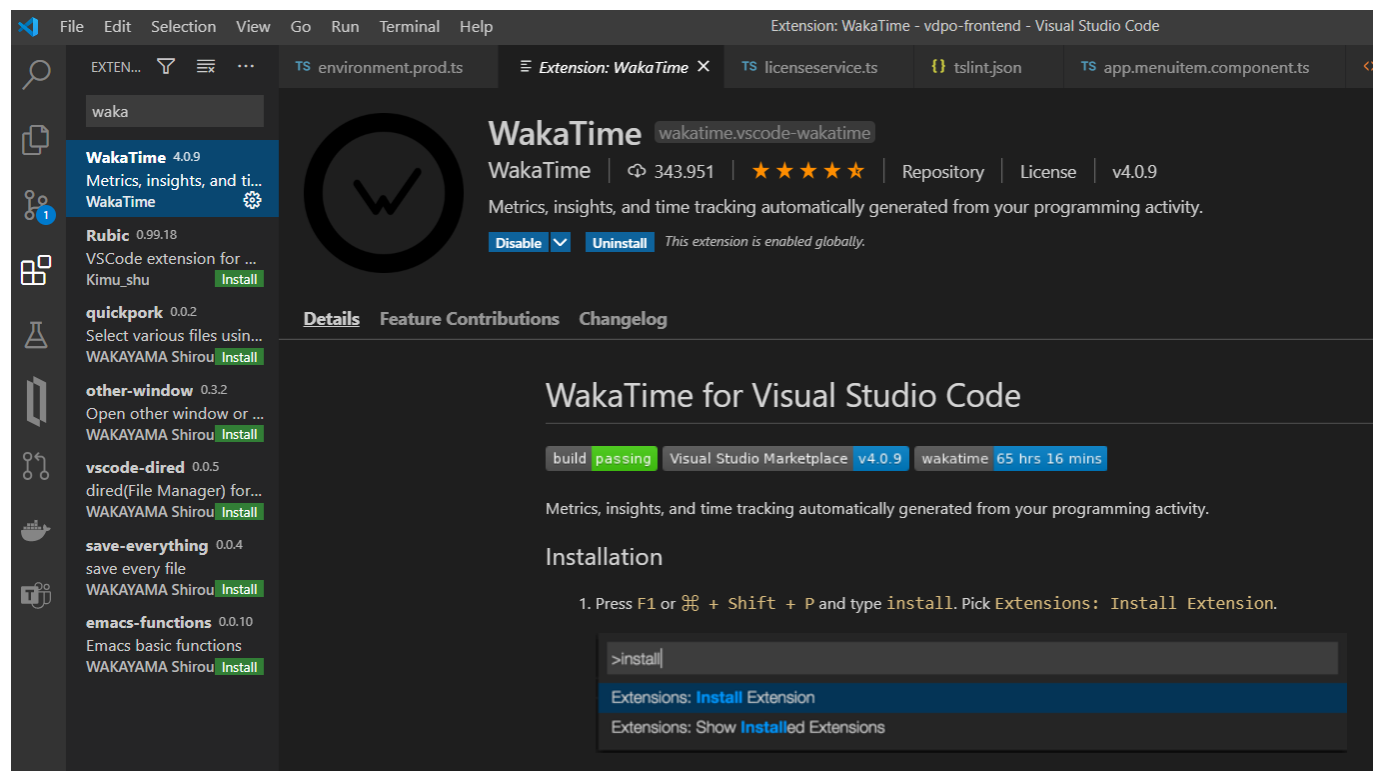

I use an excellent service to collect time programming. Is the WakaTime: <https://wakatime.com/>.

This service integrate with main IDE tools, including VSCode and collect time spent by project, language, IDE and code stats at general. See my last 7 days:

These information help me to organize and balance my targets by project.

To use Waka signup the service: <https://wakatime.com/signup> and into your VSCode, into extensions search waka, see:

Restart your VSCode and now input your api key, you can get your api key into <https://wakatime.com/settings/account>.

The free plan collect 7 days and you can download your stats to your hard disk. Great!

PS: Is OpenEdge ObjectScript language?
