## SearchTable fields can we add MSH.3 Sending Facility field?

Hi can we add one additional field in this table ?

The screenshot shows the configuration for a SearchTable field. The 'Enable Criterion' checkbox is checked. The 'Criterion Type' is set to 'SearchTable Field'. The 'Class' is 'EnsLib.HL7.SearchTable'. Under the 'Conditions' section, an 'IF' condition is selected, and a dropdown menu is open showing the following fields: PatientID, MSHControlID, MSHTypename, PatientAcct, PatientID, and PatientName. The 'Display Value' field is empty. A red arrow points to the dropdown menu.

**Can we add MSH.3 value in the SearchTable fields list**

SearchTable fields can we add MSH.3 Sending Facility field?
