## Converting HL7 message to a Web request with credentials.

Vendor we are working with can only except an HL7 ADT message via HTTPS web request. It also needs to have a cert for credentials user/pass.

Can this be done with regular basic settings in management portal along with using a cert?

Endpoint example: <https://xxxxxxx/xxxxxx/Test/TestEMR.cfm>

[#Ensemble #InterSystems IRIS for Health](#)

Product version: IRIS 2020.1
