Intersystems IRIS 2020.4.0.524.0 (Docker) & IRIS Studio

Hello,

I'm testing IRIS 2020.4 Preview with preview key.

I've access to the management portal but I can't connect with Studio.

This is my docker-command : `docker run --name my-iris --detach --publish 9091:51773 --publish 9092:52773 --volume C:\Docker\iris_external:/external --volume C:\Docker\iris_durable:/durable --env ISC_DATA_DIRECTORY=/durable/irissys containers.intersystems.com/intersystems/iris:2020.4.0.524.0 --key /external/iris.key --password-file /external/password.txt`

I notice that Caché Direct is disabled by the license.

Can someone help me out ?
