OpenVMS versions

I'm just clarifying that 2017.1 is viable on 8.4-1H1. can someone please confirm, also what kind of support would we receive if we upgraded to 8.4-2L1? I know that 2015.2 works on it. yet it says it's not supported.

we really need to get to 8.4-2L1. any help would greatly be appreciated.

thanks

Paul
