## Get file size from SFTP Service

Hi Everyone!

I try to get the file size from an Archive in a SFTP service. The input is a %Stream.Object.

I'm trying to use `input.Size` or `input.GetSize()` but i've got the next error:

```
ERROR <Ens>ErrorException: <PROPERTY DOES NOT  
EXIST>zOnProcessInput+5^BCI.MASIVA.BS.FTP.TEST.S  
- registrado como '-' número - '@' set size = plnput.Size'
```

Any suggestions?

Thanks in advance =D
