## Record Mapper not opening sample file

Hey Folks,

I am creating my first record map to import a .txt file and eventually create a message outbound. When I try to pull in the sample file I get:

ERROR #5005:

Cannot open file '/ens/mgr/interfacefiles/test/ECWBHSHAWDSurveys202012221.txt'

SOURCE ELEMENT: %ZEN.Component.html (mapSample)

Any ideas as to why? I have the sample .txt file saved as shown in the available directory. From what I have seen the #5005 error means the file is not available?

Thanks for any feedback!
