How to grant access to the Event Log ?

Hello everyone :-)

I would like to grant access to the Event Log (below in French "Journal des événements") to a user, and more generally to an existing group of users (this group is named "Helpdesk").

Helpdesk has already access to the following tables:

NAME	%ALTER	SELECT	INSERT	UPDATE	DELETE	REFERENCES	Accordé via	Accordé par	Priv. colonne
Ens.MessageHeader	-	°	-	-	-	-	Direct	MVANSEVENANT	Modifier Révoquer
Ens_Enterprise_MsgBank.Log	-	°	-	-	-	-	Direct	MVANSEVENANT	Modifier Révoquer
Ens_Enterprise_MsgBank.MessageHeader	-	°	-	-	-	-	Direct	MVANSEVENANT	Modifier Révoquer
Ens_Enterprise_MsgBank.Node	-	°	-	-	-	-	Direct	MVANSEVENANT	Modifier Révoquer
HS_IHE_ATNA_Repository_EventCube.Listing	•	•	•	•	•	•	Privilège propriétaire	_SYSTEM	

...But still the Event Log remains inaccessible:

ERREUR #5540: SQLCODE : Message -99 : User ACANOLIANO is not privileged for the operation

ERREUR #5580: Violation de privilège SQL : 'User ACANOLIANO is not privileged for the operation'
ÉLÉMENT SOURCE: %ZEN.Component.tablePane (table)

I see that the error message is about "SQL privileges" and indeed the Helpdesk group has no one for now. But it does not look familiar to me. Here is below those privileges that some other user (which has access to the Event Log) has got:

Should I add some of them into the Helpdesk group ?

(And yes in any case, the user who got the error is part of the group Helpdesk:)

Could you please help me ?

Best regards,

Mathieu
