## Voting Time: InterSystems Multi-Model Contest!

Hey Developers,

This week is a voting week for the [InterSystems Multi-Model Contest!](#) So, it's time to give your vote to the best solutions built with InterSystems IRIS.

You decide. [VOTING IS HERE](#)

How to vote?

With our new voting engine and algorithm for the Experts and Community nomination, you can select 3 projects: the 1st, the 2nd, and the 3rd place upon your decision.

This is how it works for the Community leaderboard:

### Community Leaderboard:

Place	Points
1st	3
2nd	2
3rd	1

And there will be more complex math for the Experts leaderboard, where different levels of experts have more "points" power:

### Experts Leaderboard:

Level	1st	Place 2nd	3rd
VIP level in GM, Moderators, Product Managers	9	6	3
Expert level in Global Masters	6	4	2

Specialist level in Global  
Masters

3

2

1

Experts' votes will also contribute 3-2-1 points to the Community leaderboard too.

### Voting

1. Sign in to [Open Exchange](#) – DC credentials will work.
2. Make any valid contribution to Developer Community – answer or ask questions, write an article, comment on any post, and you'll see vote buttons available.

The screenshot shows a user interface for voting on applications. On the left, a vertical sidebar contains the text 'terPl' and 'v it'. The main content area features two application cards. Each card has a teal 'Vote' button at the top. The first card is for 'deepsee-sysmon-dashboards', described as 'A small set of DeepSee dashboards for selected system monitor metrics - data collected by %SYSMONMGR utility.' It is authored by 'Semen Makarov' and has 'Experts 0' and 'Community 1' votes. The second card is for 'DeepSee Audit', described as 'Example of Deepsee usage for Caché© Audit', also authored by 'Semen Makarov', with 'Experts 0' and 'Community 0' votes. A mouse cursor is visible over the second card.

If you changed your mind, cancel the choice and give your vote to another application – you have 7 days to choose!

Contest participants are allowed to fix the bugs and make improvements to their applications during the voting week, so don't miss and subscribe to application releases!

Also, please check out the new [voting rules for InterSystems online contest here](#).
