## Open Exchange January 2021 Release

Hi developers!

Want to share with you the new release on Open Exchange we had in January 2021:

- Applications Downloads sorting;
- Contest Voting UX enhancements.

Applications by Downloads

Now you can sort applications on Open Exchange by number of [Downloads in descending order](#). Choose the sorting selector to Downloads:

### 400 Applications

The screenshot shows the Open Exchange application list interface. At the top, there is a search bar and a sorting dropdown menu. The dropdown menu is open, showing options: "Recently added", "Name A-Z", "Stars", and "Downloads". A red arrow points to the "Downloads" option. Below the search bar, there is a "New" button and a "Show only" section with checkboxes for "Starred by me" and "Followed by me". At the bottom left, there is a "Manage Apps" button. The main area displays three application cards: "VSCode-ObjectScript" (Developer Environment, 17 stars), "iris-history-monitor" (Technology Example, 17 stars), and "PythonGateway" (Interoperability, 3 stars). Each card has a "Published" status indicator.

Contest Voting UX Enhancement

Now if you not logged in you see the [voting buttons](#) which invite you to sign in to make the option to vote for the applications you like.

The screenshot shows the InterSystems Multi-Model contest page. At the top, the InterSystems logo and navigation links (CONTEST, NEWS, APPLICATIONS, COMPANIES, ABOUT, CREATE AN ACCOUNT, LOGIN) are visible. The main heading is "InterSystems Multi-Model". Below it, there's a "Topic and Rules" section with an "Attention! Sign in to vote for the project you like!" message. A modal dialog is overlaid in the center, stating "You must be logged in Developer Community for this action" and providing "Login" and "Cancel" buttons, with a link to "or create an account" below. The background content includes "Registered applications" and "Voting Ends - January 31, 2021, 11:59:59 PM EST".

Thank you for your attention!

We invite you to submit [new issues for Open Exchange](#) to make it better!
