Open Exchange January 2021 Release

Hi developers!

Want to share with you the new release on Open Exchange we had in January 2021:

- Applications Downloads sorting;
- Contest Voting UX enhancements.

Applications by Downloads

Now you can sort applications on Open Exchange by number of [Downloads in descending order](#). Choose the sorting selector to Downloads:

400 Applications

The screenshot shows the Open Exchange interface with a search bar at the top. Below the search bar, there are three application cards: 'VSCode-ObjectScript' (Developer Environment, 17 stars), 'iris-history-monitor' (Technology Example, 17 stars), and 'PythonGateway' (Interoperability, 3 stars). A dropdown menu is open, showing sorting options: 'Recently added', 'Name A-Z', 'Stars', and 'Downloads'. A red arrow points to the 'Downloads' option. On the left side, there are filters for 'Show only' (Stared by me, Followed by me) and a 'Manage Apps' button.

Contest Voting UX Enhancement

Now if you not logged in you see the [voting buttons](#) which invite you to sign in to make the option to vote for the applications you like.

The screenshot shows the InterSystems Multi-Model contest page. At the top left is the InterSystems Open Exchange logo. The navigation bar includes links for CONTEST, NEWS, APPLICATIONS, COMPANIES, ABOUT, CREATE AN ACCOUNT, and LOGIN. The main heading is "InterSystems Multi-Model". To the right, it says "Voting Ends - January 31, 2021, 11:59:59 PM EST". Below the heading, there are tabs for "Experts" and "Community". A modal dialog is centered on the screen with the text "You must be logged in Developer Community for this action". The modal contains a green "Login" button, a white "Cancel" button, and a link "or create an account". The background content is partially obscured but includes the text "Attention! Sign in to vote for the project you like!" and "Instruction on How to Vote".

Thank you for your attention!

We invite you to submit [new issues for Open Exchange](#) to make it better!
