Last version Hibernate Driver to download

The InterSystems documentation https://docs.intersystems.com/irislatest/csp/docbook/DocBook.UI.Page.cls...
says: "If you do not already have these files, contact the InterSystems Worldwide Response Center (WRC) for
download information."

Hibernate is the most used framework to do database persistence. All databases in the market allows get hibernate
driver in public repositories, InterSystems no. It is a barrier to InterSystems adoption in the Java Community.

When InterSystems will provide Hibernate jar file to public download, into a public maven repository?

#Java #InterSystems IRIS
Product version: IRIS 2020.4
