Need on Audit event functionality

Hi everybody,

Is there any functionality I could use that triggers real time user-defined code on certain audit events? Right now I am interested in triggering such code on a routine modification event, like the one below. I do know how to access this record programmatically, via `%SYS.Audit`.

Audit Details	
Close	
Audit Details:	
Description	^\\^c:\cachesys\mgr\prem\ TestAG
Timestamp	2021-02-05 15:34:32.744
UTCTimestamp	2021-02-05 20:34:32.744
Event Source	%System
Event Type	%System
Event	RoutineChange
Username	
Pid	10440
JobId	54591517
JobNumber	29
IP Address	127.0.0.1
Executable	
System ID	
Index	698
Roles	%All
Authentication	
Namespace	PREM
Routine	rouProc+144^%R "\\^c:\cachesys\mgr\cachelib\"
User Info	
O/S Username	
Status	
Event Data	

Thanks in advance,
Anna
