## Job Opportunity for Back-End Developer in Brussels

As a Belgian leader in developing and operating entertainment solutions in the sports betting and casino games sector, Bingoal is a dynamic and ambitious company looking for a passionate **Back-End Software Engineer**. Together with the IT team, you will be working to create scalable and easy to maintain software having an impact on the core of Bingoal's activity.

We are looking for a developer with InterSystems ObjectScript Experience.

As a Belgian leader in developing and operating entertainment solutions, Bingoal is a dynamic and ambitious company looking for a passionate Back-End Software Engineer. Together with the IT team, you will be working to create scalable and easy to maintain software having an impact on the core of Bingoal's activity.

### Requirements

- You know how to code and have experience with multiple languages; two of them at least being Object Oriented
- You believe that if you know how to code, you can adapt and learn regardless of the stack / architecture used
- You have experience developing, delivering and maintaining APIs and backend tools
- You've dealt with one or more flavours of SQL implementation and writing queries is a natural reflex
- You understand and have experience with transactions and data modeling
- You're not afraid to deal with huge amounts of data
- You believe clean code is important but you're not afraid of dealing with a legacy code base
- You have experience with a source control implementation
- You have knowledge of and experience with at least one of the following languages: C#, .Net, java, python or php
- Experience with 'Intersystem Caché Scripting' is a plus
- Understanding of advanced security protocols and secured development processes is a plus

### Qualifications

- You have a "can do" attitude to keep producing high quality code and functionalities for the end user
- You are willing to be responsible for the architecture and maintenance of the platform
- You have the desire to create clean code and leave it better than you found it
- You hold a bachelor's or master's degree in Computer Sciences or you have equivalent experience
- Fluent in English; Dutch and/or French is a plus

### What we offer

- An agile and ambitious environment
- A culture of continuous development and growth
- An attractive and competitive remuneration package based on your skills and seniority
