What is the macro or internal function call for lib path for the IRIS installation?

Hi folks!

Each IRIS installation has a /lib folder which is intended for 3rd-party libraries being used in the solution.

For IRIS installation the typical path is:

```
/usr/irissys/lib/
```

In [ZPM](#) the shortcut is `${libdir}`.

What is the macro or internal function to obtain it programmatically?

[#Deployment](#) [#InterSystems Package Manager \(IPM\)](#) [#InterSystems IRIS](#)

Product version: IRIS 2020.3
