## Apache 2.4 Web Server / IS Iris

I plan to install an Apache Web server (2.4.x) on a Linux server. The IRIS DB server is running on a separate Linux Server . Do I need to install InterSystems IRIS software on the Web server to allow the web gateway and CSP server to communicate ? I read through a few IS documents, however, it's still not clear if I need to install IS on the Web servers .. Any help would be appreciated ..

[#InterSystems IRIS for Health](#)

Product version: IRIS 2020.3
