New Video: AI+ML Summit Convergent Analytics - Cross-Industry Stream

Hey Developers,

Please welcome the new session recording from the InterSystems AI+ML Summit 2021:

> AI+ML Summit Convergent Analytics – Cross-Industry Stream

Start from looking at InterSystems IRIS as DevOps-embracing real-time AI/ML platform, continue by watching a demo of distributed AI/ML computations - a real-time AI/ML solution runs in IRIS and is being audited by an external Data Scientist whose IRIS instance receives a sanitized training dataset via Azure. Conclude by learning about a **cross-industry scenario** for real-time AI/ML automated using IRIS.
