Is there any option to disable Ensemble SSL certificate validation in a REST Operation?

We would need some help,

Thanks in advance for your replies,

We can POST directly via POSTMAN only if we disable "SSL certificate verification"
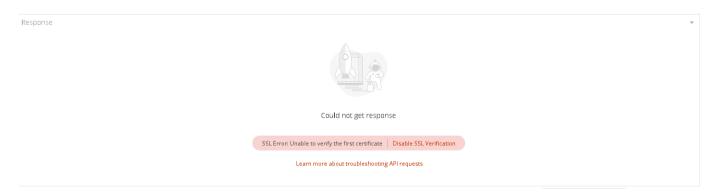

We see the response:

However if we turn on "SSL certificate verification" it shows:

So, when we use Ensemble and a REST Operation, it outputs:

*ERROR <Ens>ErrException: <THROW>zdoLoginToken+22^Operaciones.REST.HistoriaClinica.VacunasAPI.1 *%Exception.StatusException ERROR <Ens>ErrHTTPStatus: Recibido estado no correcto 403 del servidor HTTP remoto: 'HTTP/1.1 403 Forbidden' -- - registrado como '-' número - @ ' Set sc=tSC Throw:('sc) ##class(%Exception.StatusException).ThrowIfInterrupt(sc)'*

How could we achieve to disable SSL validation in the REST Operation?

We are trying to connect to a https URL and we would need to turn off SSL validation in Ensemble

How could we turn off SSL validation in Ensemble?

We have read:
