## Workshop exercises: develop REST APIs and manage them using InterSystems API Manager

Hi Community!

Today I'd like to share with you a link to some exercises from a workshop about developing REST APIs and how to manage them using InterSystems API Manager.

It includes step by step exercises to:

- Developing REST APIs from OpenAPI specifications.
- Adding the created API in an interoperability production (optional).
- Basic API management in InterSystems API Manager (service, route, auth, consumers, rate limiting, etc.).
- Some other more complex scenarios in InterSystems API Manager like load balancing, or routing by header.

You will find it all here:

<https://openexchange.intersystems.com/package/workshop-rest-iam>
