Do you install and configure InterSystems HealthShare Patient Index? If so, we would like your input.

Hello All,

InterSystems Certification has designed a certification exam for technical specialists who work with HealthShare Patient Index. We need input from our community to help validate the exam topics. Here's your chance to have your say in the knowledge, skills, and abilities that a certified HealthShare Patient Index Technical Specialist should possess.

Exam title: HealthShare Patient Index Technical Specialist

Exam candidate: An IT implementation professional who:

- has 6-12 months experience with installing, configuring and supporting the HealthShare Patient Index product to support the HealthShare Unified Care Record.
- has domain expertise in the use of Master Patient Index operations to enable identification of problems in data and training of users.

How can you help? If you have 30-60 minutes to fill out a task survey, you can rate each proposed exam topic based on your experience.

Interested? Please contact the Certification Team at certification@intersystems.com.

Thank you!

Kate Schell, Contractor, Certification, InterSystems
