## IRIS and VsCode Questions

Hi Community,

I'm developing an IRIS environment for a project and I would like to take some questions to pass on to the developers that I haven't found yet here in the community:

1. Is it possible to debug the process in VSCode in real time?
2. How can we use the terminal in VsCode for some configuration or just import applications (Example: [Web Terminal](#))?

[#IRIS Analytics Architect](#) [#InterSystems IRIS](#) [#VSCode](#)

Product version: IRIS 2020.4
