[Resolved] Management portal auto refresh

Does anyone know how to disable the auto-refresh in Healthshare, especially for Message viewer , Business process designer, DTL editor pages?

These pages in management portal refresh every 15min(i.e. as per the session time out setting) . I tried to set the following two configs to disable the auto refresh but both had no impact.

```
set ^EnsPortal("DisableInactivityTimeout","Portal") = 1
```

```
set ^%SYS("Portal","EnableAutoRefresh") = 1
```

Thank you for your help.

Mary
