## Health connect search bar not working

Upgraded healthshare to health connect. The search box is not selecting the correct url

i.e. selecting message loads

[http://penn-tietest:57772/csp/sys/EnsPortal.MessageViewer.zen?\\$NAMESPACE=TIE](http://penn-tietest:57772/csp/sys/EnsPortal.MessageViewer.zen?$NAMESPACE=TIE)

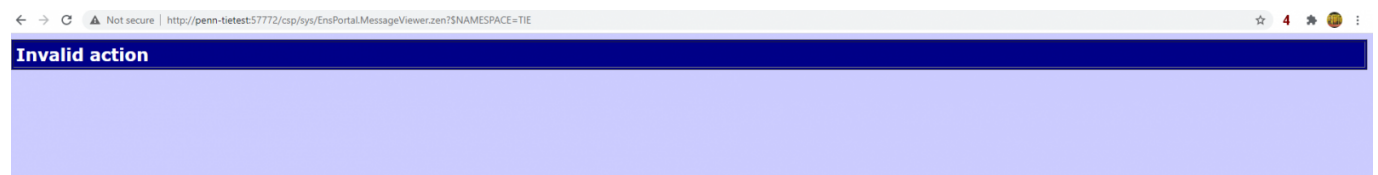

instead of this which when go through the menu it loads

[http://penn-tietest:57772/csp/healthshare/tie/EnsPortal.MessageViewer.zen?\\$NAMESPACE=TIE](http://penn-tietest:57772/csp/healthshare/tie/EnsPortal.MessageViewer.zen?$NAMESPACE=TIE)

it actually loads from interoperability view messages as

[http://penn-tietest:57772/csp/healthshare/tie/EnsPortal.MessageViewer.zen?\\$NAMESPACE=TIE&\\$NAMESPACE=TIE&](http://penn-tietest:57772/csp/healthshare/tie/EnsPortal.MessageViewer.zen?$NAMESPACE=TIE&$NAMESPACE=TIE&)

Please can someone advise

[#Management Portal](#) [#Health Connect](#)
