New Video: System Alerting & Monitoring

Hey Developers,

Please welcome the new video on [InterSystems Developers YouTube](#):

[System Alerting & Monitoring](#)

Learn about System Alerting and Monitoring (SAM), the monitoring solution for your clusters that is easy to use, operate, and adapt. SAM leverages a native InterSystems IRIS data platform Prometheus exporter on the back-end and open source components on the front-end that can be customized as needed.

Additional resources:

- [SAM on GitHub](#)
- [Documentation](#)
- [Official announcement](#)
- [A Use Case](#)

Presenter: [@Murray Oldfield](#), Principal Technology Architect, InterSystems

Enjoy watching this video and stay tuned!
