Trying to send a simple error letting the user know the try did not happen

In this case I am trying to just send a simple error to the log in the event the try is not successful. Have tried a few ideas I have found on the forum but none have worked as of yet.

```
try {  
    // Write facility Details to cloned message  
    set newPV139 = (FacilityNPI1 "_" FacilityName "_" ServFacility "_" FacilityTIN "_" FacilityAddressLine1  
    "_" FacilityCity "_" FacilityState "_" FacilityZip "_" CountyName "_" FacilityPhone)  
    set newPV139insert = newrequest.SetValueAt(newPV139, "PV1:39(1)")  
}  
catch exception {  
  
}
```
