Perl / Python Bindings from Cache 2018 to IRIS for Health 2020

Hello,

I believe that the Perl and Python bindings that exist on Cache / Ensemble do not exist on IRIS for Health 2020.1 ... is that correct?

Is there any similar documentation and samples (like below) , that show an example of how to run a basic Perl or Python script that connects with ODBC or whatever the recommended way?

<http://docs.intersystems.com/cache20102/csp/docbook/DocBook.UI.Page.cls?...>

<http://docs.intersystems.com/cache20102/csp/docbook/DocBook.UI.Page.cls?...>

Thanks
