Adding a DR member to a mirror get "Missing Mirrored Databases Report"

Hi,

I'm trying to add a DR async member to a mirror but when I add this member I get this messages in the mirror monitor (on the DR member): This system is an Async member

Async Member Name SUYPLATPREMPI02/RMPI

Async Member Type Disaster Recovery (DR)

Mirror Member Status for MPIPREP

Member Name	Member Type	Status	Journal Transfer	Dejournaling
SUYPLATPREMPI01/RMPI	Failover	Primary	N/A	N/A
SUYPLATPREMPI02/RMPI	Disaster Recovery	Connected	Caught up	Caught up

Incoming Journal Transfer Rate for This Member (over refresh interval)
--- (will be displayed on refresh)

Missing Mirrored Databases Report

Mirrored Database Name
:mirror.MPIPREP:HSSYS
:mirror.MPIPREP:MPIINUS
:mirror.MPIPREP:REGINUS

Mirrored Databases for MPIPREP

Filter: Page size: Max rows: Results: 0 Page: of 1

Name	Directory	Status	Next Record To Dejournal (Time, Filename, Offset)
No Results			

Click 'Go' to perform an action on multiple databases

--Select an action--

The message im talking about is the "missing Mirrored Databases report".

The only step I did was the " System Administration -> Configuration -> Mirror Settings -> Join as Async" an fill the blanks. Maybe Im skipping a step?

I dont get how to make this DBs start getting synchronized, the cconsole log dont show nothing

Thanks a lot!!!
