Renaming and installed Instance of IRIS

Is there any way (on a Window machine) to rename an installed instance? I installed my instance as 20201 and now I've upgraded in place to 2020.4 and I would like to change the instance name to be 20204, but I'm not sure how/where/or-even-if-possible to rename the instance.

Am I out of luck, or is this possible?

Thanks
