## Property defined as null or consisting of sub-properties

Needing to know how to define a property that can either be sent in my response as

"members": null,

or

```
"members": [  
  {  
    "dob": "1905-05-01",  
    "firstName": "BOB",  
    "middleName": "T",  
    "nameSuffix": "",  
    "genderCode": "M",  
    "lastName": "COLLINS",  
    "memberId": "123421741",  
    "relationship": "Subscriber"  
  }  
],
```

Not sure if this is possible. Currently defined as

Property members As %VarString;
