Cache Error: <<READ>Dispatch+14^%SYS.BINDSRV and Cache Error: <<READ>ServerLoop+16^%SYS.DBDRV

Hi,

I'm getting thousands of errors like the ones below:

```
2021-05-03 14:11:44 [SQLCODE: <-400>:<Ocorreu um erro fatal>] [Cache Error:
<<READ>Dispatch+14^%SYS.BINDSRV>] [Location: <ServerLoop>] [Client info: <Username: KIORAS, Node
Name: 3IK0VLS5UU, IP Address: 192.168.1.223, Executable Name: EXTRService.exe, Internal Function: B0>]
[%protocol: <52>] $Id: //ce/2018.1.2/kernel/common/src/aiclass.c#1 $ 23468 104
```

```
2021-05-03 14:35:39 [SQLCODE: <-400>:<Ocorreu um erro fatal>] [Cache Error:
<<READ>ServerLoop+16^%SYS.DBDRV>] [Location: <ServerLoop>] [Client info: <Username: KIORAS, Node
Name: D5MWWW2, IP Address: 192.168.1.128, Executable Name: w3wp.exe, Internal Function: DQ>] [%protocol:
<52>] $Id: //ce/2018.1.2/kernel/common/src/aiclass.c#1 $ 23468 104
```

What can it be?

Can these errors slow my system down? Because I'm having a lot of slowness and thousands of these errors in the log (System> System Logs> View xDBC Error Log> xDBC Errors)

Thanks.
