IRIS or Cache?

Hello all,

I am in a bit of a situation where I could get your help please.

I want to get certified with IRIS, but I also do see that there is an availability named Cache.

Are they both the same or different? if different please explain it to me as how?

Also what is the difference between IRIS, IRIS for Health, Deep Sea? Please explain to me.

Also what do you think I should get my self certified with?

Please leave your comments below.

Cheers.
