Clinical Viewer - Track Care configuration for results flags from "Abnormal" to "High or low"

I am looking for if any configurations are available to display the Lab Results Flag from abnormal to low or high based on the results. Below is the snapshot of the example, Result is 1.5 and reference range is 0.28-1, So if i want to display this as High, are there any config available in track care or layout editor.

Result	Units	Flag	Reference Range
1.5	mmol/L	Abnormal	0.28 - 1
