Contractor or Full Time for CVS Health

I am looking for an experienced IRIS for Health engineer to join the CVS Health family.

This position can be contractor, contractor for hire or direct hire.

We are doing our first implementation of the product and can use someone with experience.

The contractor role can be fully remote.

For a hire we are currently fully remote due to COVID, however, post COVID, we should be in a hybrid model (some remote and some onsite) in the Chicago area.
