ERIS in IRIS remote directory configuration

Hey guys,

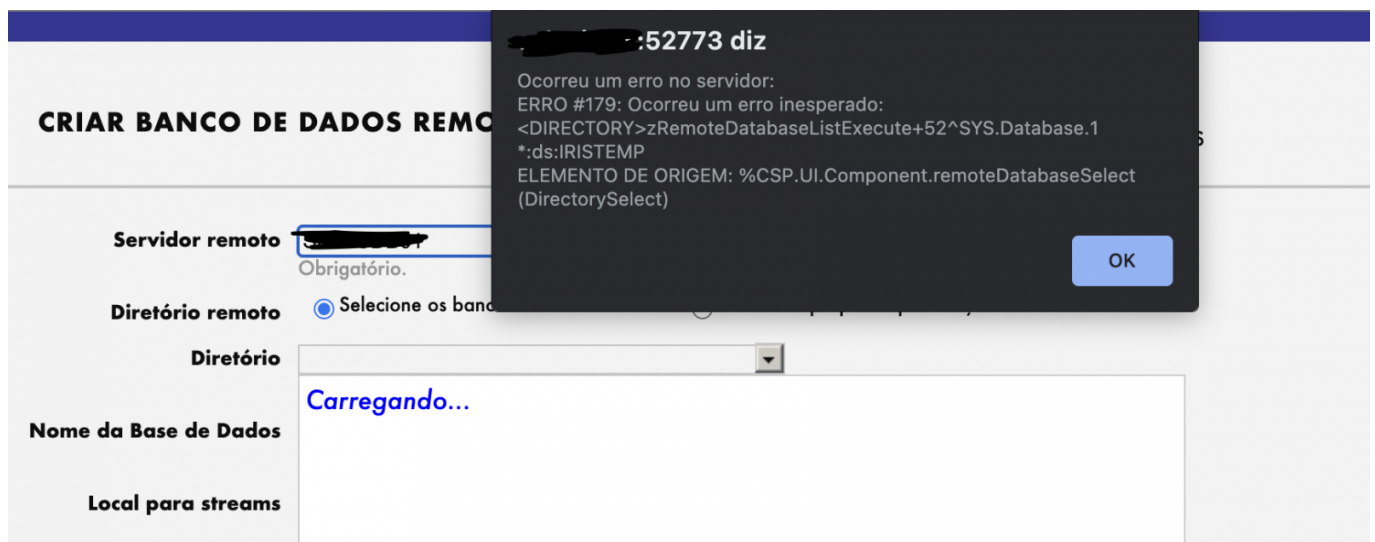

I have a problem when creating a remote database (via ECP), when I select the remote directory field it presents the error below:

"There was an error on the server:

ERROR # 179: An unexpected error has occurred:

<DIRECTORY>zRemoteDatabaseListExecute+52^SYS.Database.1.*:ds:IRISTEMP

ORIGIN ELEMENT:% CSP.UI.Component.remoteDatabaseSelect (DirectorySelect)"

Has anyone ever experienced this?
