Developer Community Release, June 2021

Hi Developers!

This is a release of how we improve the Developer Community in June 2021. The key features are:

- Improved monthly digest
- Completely new design of Direct Messages (new features included)

See the details below.
Improved monthly digest

Numbers everywhere!

We've collected some basic statistics of the DC site and added key numbers to the monthly digest. Now you can easily see the scope of our Community.

New design of Direct Messages

Meet a completely new and improved version of Direct Messages (DM)!

Just imagine full-fledged Email inside the Community – our members can easily communicate with each other via DM, create conversations for several members, chat on certain subjects, etc.

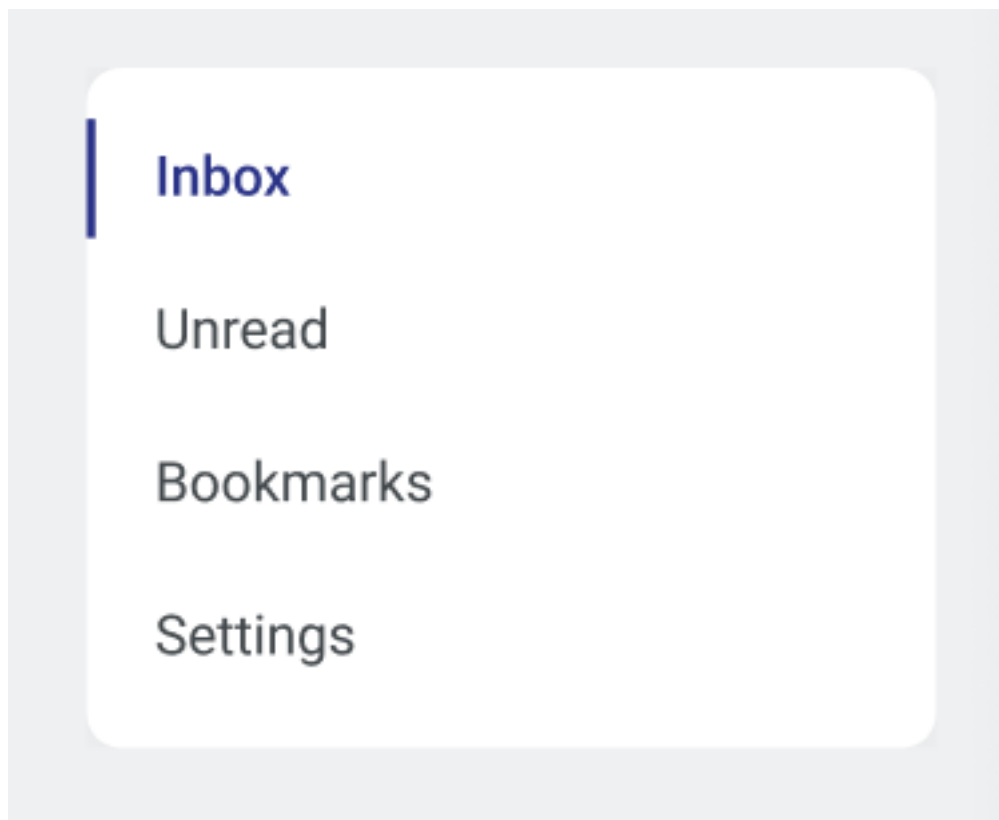

The screenshot shows the InterSystems Developer Community interface. At the top, there's a navigation bar with links: Learning, Documentation, Community, Open Exchange, and Global Masters. Below this, a header bar contains the InterSystems logo, navigation links (Posts, Events, Products, Jobs, Members, About), a search bar, and user profile icons. The main content area displays a list of messages. On the left, there's a sidebar with 'New message' and a list of folders: Inbox, Unread, Bookmarks, and Settings. The message list has columns for checkboxes, message content, and dates. The first message is from Anastasia Dyubaylo, dated Jun 23, with the subject 'Developer Community Release'. The second message is from Evgeny Shvarov, dated May 15, also with the subject 'Developer Community Release'. The third message is from Evgeny Shvarov, dated May 03, with the subject 'New Project'. The fourth message is from Anastasia Dyubaylo, dated May 01, with the subject 'Developer Community Release'. The fifth message is from Aleksey Kanashevskiy, dated Apr 28, with the subject 'New Project'. The sixth message is from Irina Podmazko, dated Apr 26, with the subject 'Developer Community Release'. The seventh message is from Evgeny Shvarov, dated Apr 11, with the subject 'New Project'. The eighth message is from Anastasia Dyubaylo, dated Apr 03, with the subject 'Developer Community Release'. The ninth message is from Irina Podmazko, dated Mar 13, with the subject 'New Project'. The tenth message is from Aleksey Kanashevskiy, dated Mar 08, with the subject 'Developer Community Release'. The eleventh message is from Evgeny Shvarov, dated Feb 16, with the subject 'New Project'. The twelfth message is from Anastasia Dyubaylo, dated Feb 02, with the subject 'Developer Community Release'. The thirteenth message is from Aleksey Kanashevskiy, dated Jan 15, with the subject 'New Project'. The fourteenth message is from Irina Podmazko, dated Jan 01, with the subject 'Developer Community Release'. On the right side, there are two promotional cards: 'News' with a Discord logo and 'App of the week' with a diagram of the IRIS R Gateway template.

Create your personal or group chats, add subject, learn about your messages' views, and more...

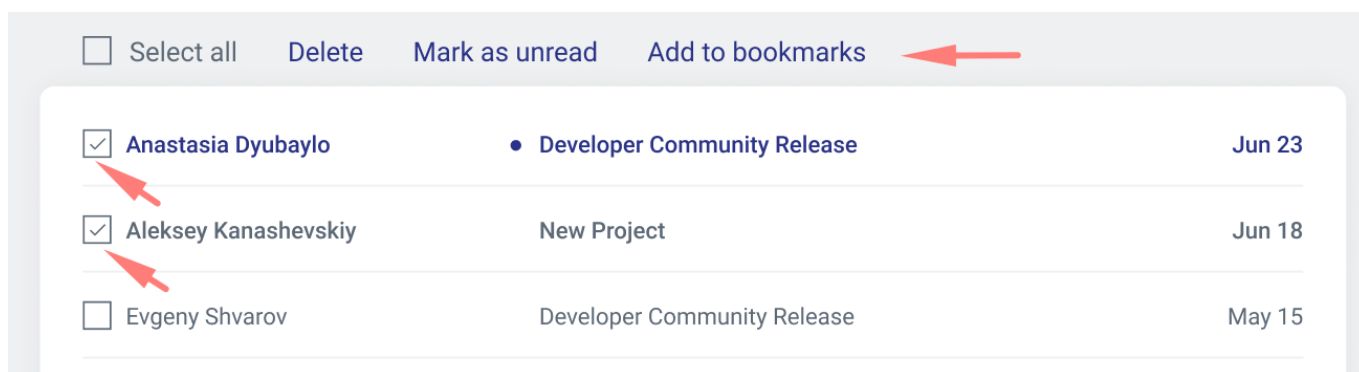

The screenshot shows the InterSystems Developer Community interface with a chat conversation. At the top, there's a navigation bar with links: Learning, Documentation, Community, Open Exchange, and Global Masters. Below this, a header bar contains the InterSystems logo, navigation links (Posts, Events, Products, Jobs, Members, About), a search bar, and user profile icons. The main content area displays a chat conversation. On the left, there's a sidebar with 'New message' and a list of folders: Active chat, Inbox, Unread, Bookmarks, and Settings. The chat conversation has a subject line: 'InterSystems joins the open source ObjectScript for VS Code effort'. The members listed are Konstantin Makarov and Anastasia Dyubaylo. The first message is from Anastasia Dyubaylo, dated Dec 22, 2020 10:25 AM, with the content: 'Hi all, I'm excited to announce that InterSystems will be joining the open source community for InterSystems ObjectScript extension to Visual Studio Code! Learn more in this post! 📄👉'. The second message is from Konstantin Makarov, dated Dec 26, 2020 10:25 AM, with the content: 'Hi all, In addition to deciding on VS Code as a platform, we've also made the significant decision to join the open source community. Our mission for the project is to develop VS Code support for server-side workflows familiar to long-time InterSystems customers, while also offering a client-centric workflow paradigm more in line with the way mainstream programmers think. Stay tuned!'. At the bottom, there's a text input field with a 'WYSIWYG' dropdown and a 'Send' button. On the right side, there are two promotional cards: 'News' with a Discord logo and 'App of the week' with a diagram of the IRIS R Gateway template.

So what's new?

We've added a side menu with several tabs for easy navigation in DM:

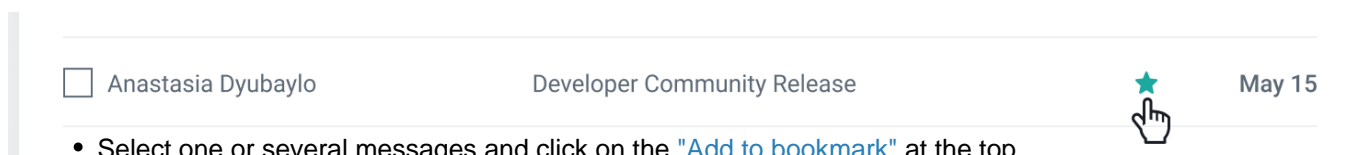

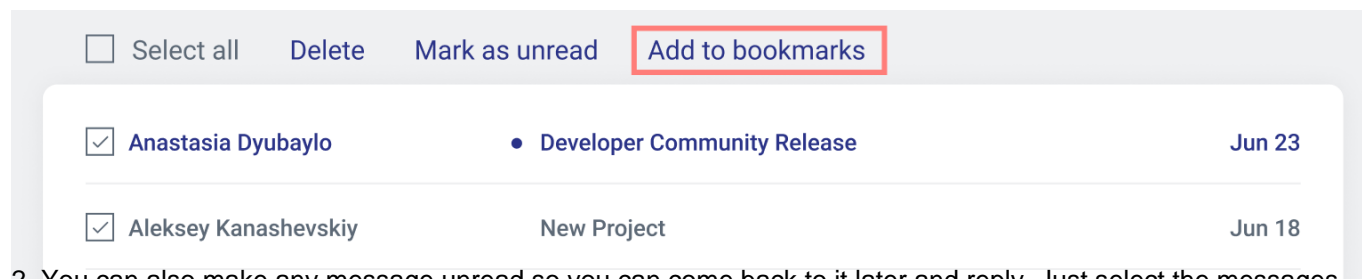

To use the new functionality, select one/multiple/all messages. New features will appear at the top:

1. You can add messages to your bookmarks in one of the following ways:

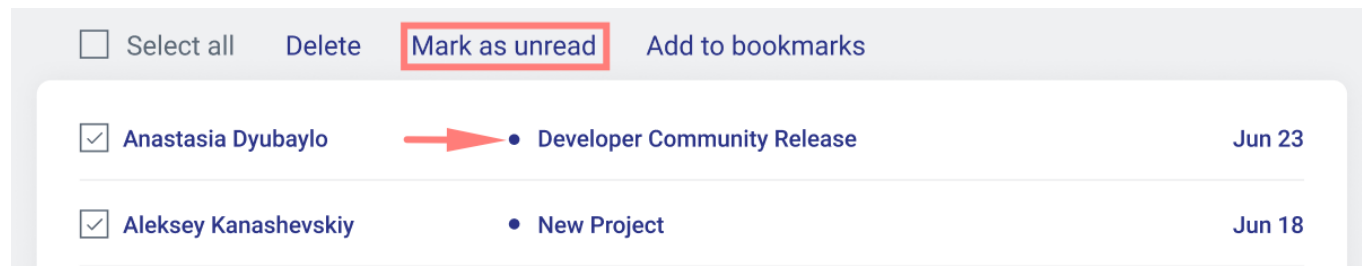

- Click on the star icon when hovering over the message subject

2. You can also make any message unread so you can come back to it later and reply. Just select the messages you want and click on "[Mark as unread](#)".

All new messages are marked with a blue dot.

For the mobile version, we've developed a modern and lightweight design.

 **Anastasia Dyubaylo**
Dec 22, 2020 10:25 AM

Hi all,

I'm excited to announce that InterSystems will be joining the open source community for InterSystems ObjectScript extension to Visual Studio Code. Early this year I posted that we were on a journey to redefine the future of our IDE strategy, and what came out of that is Visual Studio Code is the IDE that can support that future. It's fast, stable, feature-rich, and built on a modern technology architecture that affords us the ability to offer you far more functional activities than ever before, paving the way for continuous development.

Hi guys,

In addition to deciding on VS Code as a platform, we've also made the significant decision to join the open source community.

 **Irina Podmazko**
Dec 26, 2020 12:25 AM

Hello

You can easily select messages by clicking on the user's avatar to use one of the features at the top. Move between tabs in the drop-down menu.
