## Looking for Python Developers for IRIS Embedded Python early access program

We ' re looking for Python developers to participate in our Embedded Python Early Access Program! If you (or someone you know) are a Python developer and are interested, please contact us via the email address below.

InterSystems is bringing the power and simplicity of Python to IRIS. We ' re hard at work integrating Python directly into the IRIS kernel, making it a full peer to ObjectScript.

- Use any of thousands of pre-built Python libraries
- Easy access to IRIS from Python, and Python from ObjectScript
- Mixed ObjectScript and Python classes

The Early Access Program is a way for you to help shape the future of IRIS by giving us feedback on upcoming features. Participants will all receive dedicated kits of prerelease software along with instructions, documentation, and examples so you can get a head start on building amazing solutions while having fun. Plus you ' ll get an awesome InterSystems sweatshirt and maybe more. All we ask in return is your feedback about what ' s delightful and where we should improve.

RSVP: [python-interest@intersystems.com](mailto:python-interest@intersystems.com)

The “ Python Developer ” phase of the Early Access Program will run from June 28<sup>th</sup> through July 26<sup>th</sup>, 2021
