What does this error occur?

I am getting the following error when trying to fetch data from DeepSee:

```
"Error": "ERROR #5002: Cache error: <PROTECT>%Construct+3^%DeepSee.ResultSet.1  
^DeepSee.Cache.LocalResults('/session/'),e://hs-db/tfoms/"
```

However, I cannot find the place this error points me to.

Specifically, it says 'Label %Construct + 3 lines, in the %DeepSee.ResultSet.1', but there does not seem to be such a place. I could only find the %DeepSee.ResultSet class and it does not have a label named %Construct.
