Unable to move CSV file to Archive

Currently have an SFTP server setup to deliver a CSV file to a company "Company XYZ"

Failed to move '\\dir-01\files\Company XYZ\Outbound\To Be Processed\Company XYZ data v1.csv' to Archive file '\\dir-01\files\Company XYZ\Outbound\Archive\CompanyXYZv1.csv'

The Business Service File Spec : Company XYZ v1.csv

archive path same as listed above

Is it the File Spec that needs to be changed for this to prevent erroring out?
