## Use of \$ZUTIL(12)

As you know the \$ZUTIL method is deprecated and I'd like to replace this calls for the corresponding ones.

In my case I'm looking to replase \$ZUTIL(12) by `##class(%Library.File).NormalizeDirectory("")`

But the response is not the same while \$ZUTIL points to mgr folder NormalizeDirectory points to my Logic Databse Folder.

Is there a way to proper do this replacement?

Thanks a lot
