IRIS - Native API and .NET Provider - Have a little Regression to Cache .net Provider ?

Native API , IRIS 2019 regression vs Cache .Net provider

1. checking the native API, with .net provider, from IS docs, I realize,

that it is not possible to wrap objectScript Class with .NET (C# for example) pure Class with it's methods/properties and make pure instance syntax of: `new myNetClass` - as wrapper of `irisClass`.

as I realize, you can run .Net Class , only with `.Invoke` or `iris.ClassMethodVoid("class.name","method")`

such syntax, cannot execute event driven on property change, let say, with it's build in mechanism in .Net

2. IRIS 2019.

this version is missing the class `IRISObject` ? I have to upgrade to IRIS2021 ?

[#.NET #InterSystems IRIS](#)

Product version: IRIS 2019.1
